Jeju National University partners with VSU on using drones to characterize root crops

Jeju National University partners with VSU on using drones to characterize root crops

Written by Ulderico B. Alviola

Published: 20 March 2023

Jeju National University's Subtropical Horticulture Research Institute (JNU-SHRI) signed a Memorandum of Understanding (MOU) with the Visayas State University's Philippine Root Crop Research and Training Center (VSU-PhilRootcrops) to engage in field characterization of root crops using drone technology.
